

Homewood Public Library Robotics Club

The HPL Robotics Club is open to any student who lives in Jefferson County and will be in middle school (public, private, or home school) in the school year 2017-2018.

Robot club meets on Tuesdays from 6:45PM to 8:45PM, running from June 6 to July 25*

Registration Form

To register, fill out this form and e-mail it to dr.gauntt@bellsouth.net

Student's name	
Student's school	
Grade in fall 2017	
Parent's names	
Students e-mail address	
Parent's e-mail addresses	

The following questions are to help in planning; the answers will not affect whether you will be able to enroll.

Do you or your parents have experience in robotics and are willing to mentor less experienced students?	
Will you bring a laptop computer?*	
Will you bring your own robotics kit?*	
Are you interested in installing Java programming software on your laptop?*	
Are you interested in installing C programming software on your laptop?*	

*If want to install software on your laptop, we will send you instructions on how to download and install the software. You must download and install the software at home; the files to download are huge and will clog up the library WiFi if you try to download the files at the library. If you have any trouble installing the software, contact Dr. Gauntt by e-mail; he will be too busy during the sessions to help with software installation. However, on the first day of the club (June 6) Dr. Gauntt will be at the library an hour early (at 5:45PM) to help make sure that your software is installed properly.

**If want to bring your own Legos Mindstorms NXT kit and would like to program your NXT brick using Java, we will send you instructions on how to set up the brick.
